SUMMARY

Frontend Engineer with 4.5+ years of experience building scalable web applications with React, Next.js, and TypeScript across data-heavy B2B SaaS, logistics, and real-time analytics platforms. Specialized in Core Web Vitals optimization, state management, and architecting reusable UI systems to maximize frontend performance and developer velocity.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router), Redux Toolkit, Zustand, Tailwind CSS, Material UI

Languages: TypeScript, JavaScript (ES2022+), HTML5, CSS3, PHP

Performance & Data: Core Web Vitals, Code Splitting, Lazy Loading, TanStack Query, REST APIs, Axios, WebSockets

Testing & Tools: Jest, React Testing Library, Vitest, Git, Vite, Webpack, Vercel, Docker, Figma, JIRA

EXPERIENCE

Pixel Consultancy

Jul 2025 – Present

Software Engineer

Kolkata, WB

- Migrated key pages to Next.js 14 App Router with Server-Side Rendering (SSR), cutting TTFB by 35% across core customer workflows.
- Refactored API data layer using TanStack Query with custom stale times, reducing network payload traffic by 40% on high-load views.
- Architected a shared component library adopted across 5+ product modules, reducing feature scaffolding time by 60%.
- Enforced strict TypeScript mode across the codebase, increasing type safety coverage from 60% to 95%+.

Aggregate Intelligence

Jun 2024 – Jun 2025

UI Developer

Coimbatore, TN

- Engineered data-intensive enterprise dashboards in React and Material UI, rendering 10K+ rows lag-free via virtualized tables.
- Implemented route-based code-splitting and lazy loading, shrinking JS bundle size by 45% and cutting LCP from 4.0s to under 2.0s.
- Wrapped 8+ REST endpoints in custom Axios hooks with centralized error handling, reducing client-side API error rates by ~30%.

Pando India Software Consultants

Sep 2022 – Jun 2024

Software Engineer

Noida, UP

- Delivered 10+ production features in React and TypeScript for a high-volume logistics platform managing complex state rules.
- Replaced 4 legacy form architectures with a centralized dynamic form engine, accelerating form development velocity by 50%.

NMS Games Pvt. Ltd.

Nov 2021 – Jun 2022

Software Engineer (Frontend)

Noida, UP

- Migrated legacy monolithic PHP-rendered views to a React/Redux Single Page Application (SPA), dropping page load latency to < 800ms.
- Maintained Node.js and SQL stats reporting APIs, ensuring zero downtime across ~500 peak concurrent match sessions.

PROJECTS

Zamplia.com | [React](#), [TypeScript](#), [Redux Toolkit](#), [WebSockets](#) | [Live](#)

- Engineered a programmatic B2B survey delivery interface with dynamic conditional branching, reducing user drop-offs by 22%.
- Implemented real-time quota tracking and respondent session handling via WebSockets, reliably processing 50K+ daily survey events.

Stortrack.com | [React](#), [Redux](#), [ApexCharts](#), [Mapbox GL JS](#) | [Live](#)

- Optimized ApexCharts rendering performance for 50K+ records using a chunked data-batching layer, resolving export timeouts.
- Integrated Mapbox GL JS spatial clustering for 10K+ store markers, sustaining a smooth 60 FPS viewport interaction.

Earningsbeats | [React](#), [TypeScript](#), [Tailwind CSS](#), [TanStack Query](#) | [Portfolio](#)

- Designed multi-tiered RBAC route wrappers and session guards to ensure secure data access control across user tiers.
- Boosted Google Lighthouse performance score from 58 to 91 using `React.lazy` and query prefetching, reducing load times by 40%.

EDUCATION

Bengal College of Engineering and Technology

B.Tech in Mechanical Engineering | CGPA: 7.33

2016 – 2020

Durgapur, WB
